**Multi-functional site for
fishing, boating, swimming
and resting at Lake Vagula**

Võru Rural Municipality

Merle Tsirk

General information

- Lake Vagula is the biggest lake in South-East Estonia
- Lake Vagula is very popular for fishing, using different water vehicles, swimming and resting.
- There are 7-seated boat bridge and gravel ramp for water vehicles. About 130 m away is very nice swimming site with a pontoon. It is not enough for good accessibility to all user and interest groups.
- Järvere is one of the few places with public access to Lake Vagula, but access to the Lake Vagula is complicated.

Multi-functional site for fishing, boating, swimming and resting at Lake Vagula

The primary aim of the project is to improve the accessibility to all user and interests groups to the biggest lake in South-East Estonia.

We will do following improvements:

- The surface of the access road and car park will be covered with a crushed stone and gravel. The part of road near the boat slip will be covered with asphalt because it is important that cars and trailers do not sink there.
 - Footpath will be built between boat bridge and swimming site with some resting places.
 - The bank of the lake will be cleaned.
 - A concrete boat slip is being built (another project).
-

Thank you!
