

Facilitating access to water tourism activities, Project No. EE-LV00143: Riverways II

**July 15-16, 2025
Setomaa, Estonia**

Interreg

**Co-funded by
the European Union**

Estonia – Latvia

The project is implemented with the financial support of the Interreg Estonia-Latvia Cross-Border Cooperation Programme.

THE MAIN ACTIVITY

2 multi-functional piers on the Venta River (Skrunda) & creation of an accessible water route

Activities done so far:

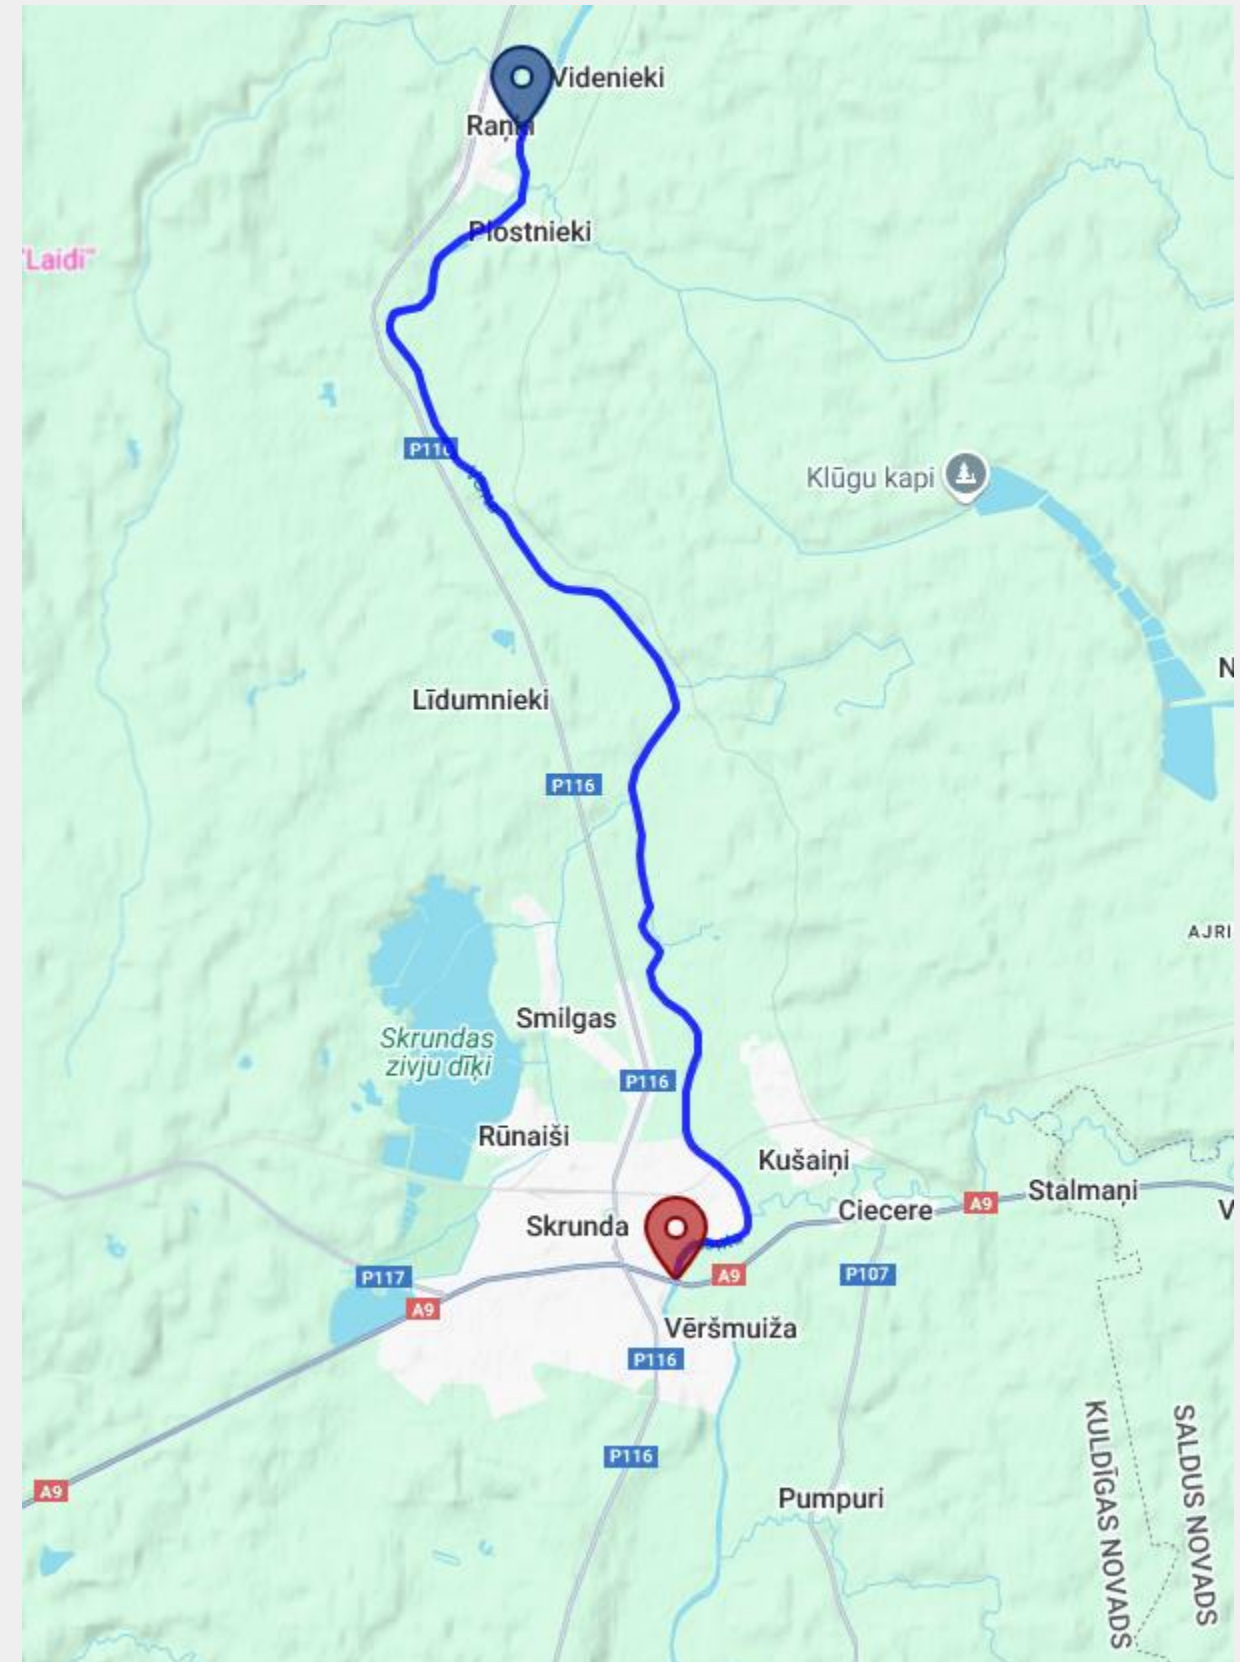

- ✓ Specified the installation **locations** and **size** of two multi-functional piers according to the flow of the Venta River and water level fluctuations,
- ✓ Secured easements for access to the pier in Raņķu parish,
- ✓ Developed pontoon sketches and technical specifications,

Activities to do:

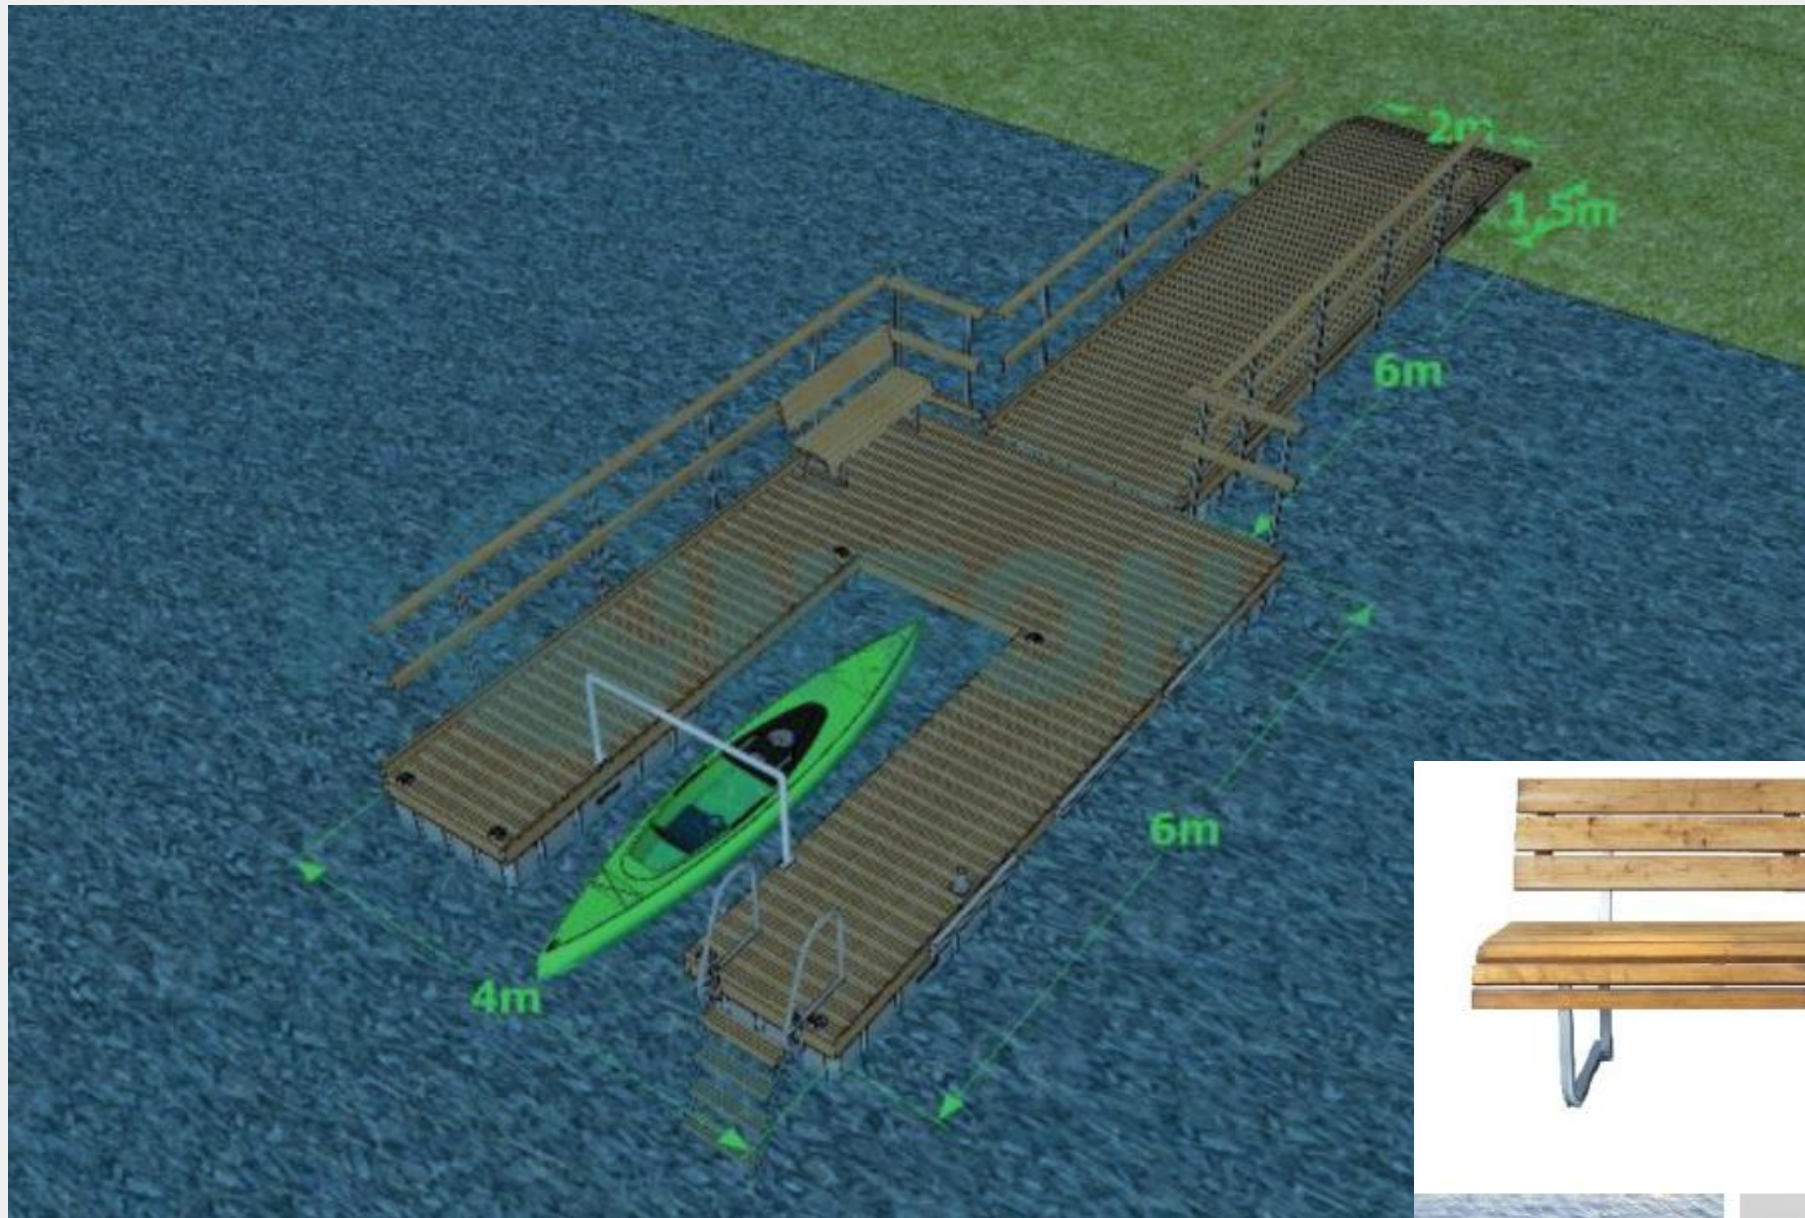

- ☐ Develop an innovative solution for equipping a boardwalk with a device or additional equipment that will facilitate/ensure boarding of a person with a disability in a kayak or canoe (within the project budget possibilities),
- ☐ Organize the procurement procedure for goods/services,
- ☐ Two multi-functional piers installation.

These improvements will allow larger variety of target groups to access the river and ensure sustainable use of the water body.

Section on the Venta River between piers

Pontoon sketches and technical specifications

THANK YOU!
