

Otepää Rural Municipality

Project „Improvement of the accessibility to Lake Pühajärv (Holy Lake), Estonia“

Key activities

Purchase of a special wheelchair
(e.g. WaterWheels) for physically
disabled people.

Done in October 2024 (on the
photo)

Key activities

Construction of the **floating pier and slipway for launching canoes** (extract from the preliminary project design doc)

The floating pier is divided into two parts - a seating area on the north side and a canoe launching area on the south side.

Technical information

Floating pier 37,4 m²

Length 10,9m

Width 3m

Slipway 6 m²

Length 4m

Width 1,5m

Key activities

Pavement of the access road
which makes the road strong and
flat and it is possible to use
wheelchairs, bicycles and baby
carriages without problems

Total project

Expected implementation period:
end of the year 2025

Total investment incl. self-
financing is 44 750,00 euros

Investment makes it possible to different groups of people, incl. families with small children, seniors, disabled people, fishermen with boats, etc. visit the lake and enjoy its beauty. It increases the number of tourists visiting the area.
