

Riverways II Project partner

Tartu County Tourism Foundation

Kaisa Äärmaa – Project Marketing Specialist

Janelle Uibokand – Project Manager

Interreg

Co-funded by
the European Union

Estonia – Latvia

Period 1- Period 2

- Visibility rules of the project were prepared and filled by SATT
- SATT participated in the hackathon “Accessibility in Water Tourism” in Latvia
- Project was introduced to South Estonia entrepreneurs by SATT project manager during informational days held by SATT
- SATT has been in communication with VEP project (an Estonian waterbodies related project) manager who is also dealing with developing access to waterbodies and meetings were held to map intrests and to see if Riverways II project can benefit in cooperation

Period 2

- Information was collected for the questionnaire of boat rental service providers from South Estonia region and from Pärnu County. Questionnaire has 28 respondents.

Küsimustik veesõidukite rentimise pakkujatele

Küsimused Vastused 28 Seaded

Kanuu- ja SUP-laua matkad Emajõe-Suursoo veekogudel. Kanuude, SUP-laudade ja matkavarustuse rent Emajõe-Suursoos. Piirkonna ainuke kanuude ja SUPide rentija. Oleme ise kohalikud inimesed, elame Emajõe-Suursoo veerel, liigume siinsel maastikul aastaringselt ja tunneme Emajõe-Suursoo kiiresti muutuvaid olusid. Meilt saab alati matkale kaasa väärt soovitusi.

1 vastus

Pakume rentimiseks sõude- ja mootorpaate ning lõbusat ajaveetmist vesirastatel. Peale veematka saad meie kohvikus nautida jahutavat jäätist või kosutavat kõhutäit. Kui soovid elamust pikendada, ootab Sind mugav ööbimisvõimalus ning mitmed sportlikud tegevused, et puhkus oleks täiuslik! Seikle, lõõgastu ja naudi – kõik ühest kohast!

1 vastus

Avasta Lämmijärve, Lämmijärve sadamaid, Emajõe või Piirisaart meiega! Paadisõit toimub ainult koos kapteniga. Väikelaevale Carmira mahub lisaks kaptenile 7 sõitjat, olemas ka wc ja kajut. Suvebaar Kambüüsis saab kaasa haarata või ette tellida jahutavad kokteileid ja snäkväagna. Sõit algab ja lõpeb Mehikoorma sadamas.

Period 2

Information was searched and gathered for the lakes survey. After period 2 there were informative tables about 20 South-Estonia lakes, some with the help of municipalities.

Gathered information was about measurements of the lake, operators, facilities, access points for fishing, etc.

Period 2

Size:		24 ha	21,1ha
Depth: if you can't find, leave empty		3m	4,1m
Short description:	Värsk harbor, built in 2020, offers docking for different types of vessels and is equipped with services and technical infrastructure. There is a parking lot, a patent slip, a floating dock, café and restrooms. The port is complemented by a 300 m promenade along the coastline of the Värsk Bay. The bay is suitable for cruising and water sports, but attention must be paid to the border regime.	Lake Õrsava , also Lake Ersava, Lake Värsk and Lake Ozerka were formed when the water of Lake Pskov flowed south into the swollen valley of the Värsk stream, with an area of 24 ha.	Obinita Lake (also known as Obinita Artificial Lake, Tuhkvitsa Reservoir, Tääglova Reservoir) is a lake in Võru County, on the eastern side of Obinita village in Estonia. The length of the waterline is 4534 metres and surface area of the basin is 43 km².

Period 2 - Period 3

- Kaisa Äärmaa participated in preparation and communication of planning inspections to the investment lakes in South Estonia.
- Discussions were held about the planned inspections and opportunities to make lakes of the region more accessible. Pictures were taken about the inspections to share them on Facebook pages.

Period 2 - Period 3

- During the project, different information has been posted to Riverways and Seikle veel Facebook pages. So far posts have been mainly about the inspections to South Estonia lakes and about different water tourism events.
- Several pictures from different rivers and lakes and about water tourism opportunities on them have been taken, as project marketing specialist Kaisa is also a nature photographer.

Period 3

- Information was gathered about fish catching-cooking places in South Estonia region. 6 places were chosen in the region. Planning inspections to these places is in work.

Period 3

- During period 3 SATT organized an Estonian side project partner meeting to discuss our activities, inspections, problems and overall questions.
- Janelle Uibokand also participated in a strategic seminar of planning inland waterbodies development as a part of cooperations with other water related projects. (VEP)
