General information

- Lake Vagula is the biggest lake in South-East Estonia.
- Lake Vagula is very popular for fishing, using different water vehicles, swimming and resting.
- There are 7-seated boat bridge and boat ramp for water vehicles. About 130 m away is swimming site with a pontoon. It is not enough for good accessibility to all user and interest groups.

Multi-functional site for fishing, boating, swimming and resting at Lake Vagula

The primary aim of the project is to improve accessibility for all user and interest groups to the largest lake in South-East Estonia.

Multi-functional site for fishing, boating, swimming and resting at Lake Vagula

Timetable

- Accessibility assessment and preparation of procurement documents, by August 2025
- Construction procurement, by October 2025
- Construction works, by July 2026
- *The planned works do not require design work.*

If it turns out that the planned works do not fit within the budget, we will have to cut something out. This is currently our maximum plan ☺
